Full-Stack Developer with 5+ years of experience building scalable web products using React, TypeScript, Node.js, PHP, and MySQL. Delivered end-to-end features in a B2B platform — including a Forum module, Calendar system, and Onboarding Form Builder with Stripe integration — across 60+ live client sites. Freelance developer with hands-on client experience. Seeking a role at a global tech company to contribute to high-impact products.

EXPERIENCE

Senior Full-Stack Developer — Brilliant Setups (Remote)

Oct 2025 – Jun 2026

- Designed, developed, and maintained production-ready full-stack applications deployed across 60+ live client websites using React, TypeScript, Supabase, REST APIs, and modern web technologies.
- Built a scalable Community Forum platform featuring nested comments, likes/dislikes, moderation workflows, administrative dashboards, rich-text editing (Froala), and user engagement notifications.
- Developed an embeddable Interactive Calendar system with event management capabilities, API-key authentication, and secure integrations with Brilliant Directories for multi-site synchronization.
- Created a multi-step Onboarding Form Builder with conditional logic, dynamic question flows, Stripe payment processing, prorated billing calculations, and automated account activation workflows.
- Led technical discovery, architecture, and feature planning initiatives while collaborating directly with leadership and clients; additionally produced end-to-end educational video content that supported customer acquisition, onboarding, and retention.

Senior Software Developer — Startpush (Remote)

Mar 2021 – Oct 2025

- Progressed from Junior to Senior Software Developer over nearly five years, taking ownership of increasingly complex full-stack development projects across a large-scale B2B web platform.
- Translated pixel-perfect Figma and Zeplin designs into responsive, high-performance web applications and custom user experiences for enterprise and commercial clients.
- Developed custom plugins, content management systems, and backend solutions for high-profile clients, including Rae Mackenzie Group and People of Color Career Fair.
- Built, maintained, and enhanced complete homepage experiences and bespoke web solutions through direct collaboration with stakeholders, designers, and clients.
- Delivered scalable frontend and backend customizations using HTML, CSS, JavaScript, PHP, and database-driven architectures while contributing to ongoing platform improvements and client success.

EDUCATION

Universidad Fidélitas — Bachelor's in Software Engineering

May 2023 – Expected graduation 2027

Colegio Técnico Don Bosco — Technical Degree in Computer Maintenance & Electronics

2017 – 2021
